## **QUARTERLY REPORT – FIRST QUARTER 2005**

[This document is a translation from the original Norwegian version]

### FIRST QUARTER IN BRIEF

- Total operating revenue for the quarter amounted to MNOK 319,7. In comparison, first quarter 2004 total revenue amounted to MNOK 236,3.
- Total earnings before depreciation, write-down and leasing costs for aircraft (EBITDAR) amounted to MNOK -15,1 in first quarter. EBITDAR in first quarter 2004 amounted to MNOK -28,2.
- Total earnings before depreciation and write-down (EBITDA) amounted to MNOK -44,2. EBITDA for first quarter 2004 amounted to MNOK -49,9.
- Earnings before tax (EBT) was MNOK -47,6, compared to MNOK -55,6 in Q1 2004.
- Earnings after tax amounted to MNOK -34,3, compared to MNOK -40,0 in Q1 2004.
- The total number of passengers transported in first quarter was 550 497 compared to 398 363 in Q1 2004, an increase of 38 %.
- Total passenger traffic (RPK) increased 61% compared to the same period in 2004.
- The passenger load factor was 68% in first quarter 2005, compared to 65% in Q1 2004.
- The total production (ASK) has increased to 569 million ASK in first quarter compared to 370 million in the same period last year, an increase of 54 %.
- The company has a cash reserve of MNOK 185,6 at the end of the quarter. The equity ratio of the company is 22%.
- Total units cost (cost per ASK) for the quarter was NOK 0,64, compared to NOK 0,77 in the same period last year, an reduction of 17%.

## TRAFFIC DEVELOPMENT

In the first quarter, a total of 550 497 passengers flew with Norwegian, compared to 398 363 the same period last year. This is an increase of 38%. The passenger load factor for the first quarter was 68% compared to 65% in the same period in 2004. Production (ASK) has increased by 54% in the quarter and passenger traffic (RPK) has increased 61%, compared to the same period last year. The growth is related to the company's expansion during the year. The company has had 12 aircraft in operation in the first quarter, compared to eight planes in the same period in 2004. The utilisation of the planes has been improved following the expansion, and every plane has per first quarter a utilization of 6,8 block hours per day, compared to 6,6 block hours in the same period in 2004.

The share of sales via the Internet was 72% in the period compared to 61% in the same period in 2004.

	1st	1st Quarter

#### **COMMENTS TO THE ACCOUNTS**

#### PROFIT AND LOSS STATEMENT

In the first quarter, the company's turnover was MNOK 319,7 compared to MNOK 236,3 in 2004, which is an increase of 35%. The increase in revenue is mainly related to the increase (61%) in revenue passengers (RPK), which accordingly is related to the increase in production (54% in ASK) with the result of an improved cabin factor with 3 %-points to 68%. The yield has during the quarter been under pressure and is reduced by 16% compared to the same period last year. This is a result of increased price pressure and increased average sector length.

The company had operating expenses of MNOK 363,9 in the quarter (including leasing expenses and excl. depr.) compared to MNOK 286,3 last year, an increase of 27%. The increase in expenses is primarily related to the increase of production (ASK) by 54% compared to the same period last year, and the expansion of the aircraft fleet from 8 last year to 12 in Q1 2005. At the same time the company has reduced its cost per ASK with 17% from NOK 0,77 in first quarter 2004 to NOK 0,64 in 2005. The reduction is related to a better utilisation of material and staff, renegotiation of important agreements as well as an overall focus on cost reductions. Through efficiency improvements of sale and marketing channels, the company has reduced costs related to sale and bookings, despite a substantial growth in number of tickets sold. The appreciation of the Norwegian krone in relation to main currencies like US dollar, Euro and British Pounds has resulted in reduced costs compared to same period last year. The total cost of jet fuel has during the quarter been 56% higher than in the same period last year, of which approximately half is related to increased fuel price and the remainder is related to increased production. Approximately 25% of the jet fuel consumption in Q1 2005 was on a hedging contract entered in December 2004. The company has no fuel hedging contracts at the end of first quarter.

Earnings before depreciation and write-down (EBITDA) amounted to MNOK -44,2 in, compared to MNOK -49,9 in Q1 last year.

## BALANCE SHEET

Intangible assets include deferred tax asset of MNOK 99,3 and capitalised expenses related to the development of IT-systems and brand name of MNOK 29,1. Investments in intangible and fixed assets amounted to MNOK 11,4 for the quarter, mainly related to upgrading of leased aircrafts and development of own IT systems.

Norwegian <u>post@norwegian.no</u>

Call centre: 815 21 815, Head Office: +47 67 59 30 00

The stock of consumable goods has increased by MNOK 28,5 during the quarter to a total of MNOK 40,3 mainly due to the purchase of parts to be used in engine overhaul this spring.

Short term receivables has a balance of MNOK 157,9 at the end of the quarter, an increase of 76,2 compared to December 31 2004. A substantial part of this increase is related to accounts receivable from customers and credit card companies due to high sales in the period. The remaining increase is related to prepaid expenses, receivable refunds from leasing companies due to heavy maintenance work on aircraft and receivable refunds related to VAT.

Accruals for pension liabilities amount to MNOK 4,8 at March 31 2005. Provisions for future maintenance are MNOK 9,1. Traffic settlement debt related to sold but not travelled tickets has increased by MNOK 142,7 to MNOK 251,7 due to high sales of the summer program 2005.

The company has per March 31 cash at hand of MNOK 185,6 compared to 195,2 at the end of fourth quarter 2004. MNOK 1,8 is related to positive cash flow from operating activities, while investments in the period has had a negative cash flow effect of MNOK 11,4. The paid up equity at the end of the quarter was MNOK 124,7 equivalent to an equity ratio of 22%.

## **ACCOUNTING PRINCIPLES**

As of the first quarter 2005 public listed companies are as a main rule, required to follow the IFRS standards in the financial reporting. The requirements are however directed towards group accounting, and Oslo Stock Exchange has announced an exception from the rule for companies without consolidated accounts. Norwegian Air Shuttle ASA is not a group and has no group accounting. Due to changed regulations and the company's implementation of new financial and accounting systems, the company has decided to adopt IFRS accounting as of Q1 2006. The IFRS adoption process so fare has revealed the main differences from the current GAAP to be related to the recognition of differed tax asset, accounting for pension liabilities, and provisions for future maintenance of aircraft.

The company has entered into a code share agreement with Sterling with effect as of first quarter 2005, and has a similar agreement with Fly Nordic. The basis of the agreements is that Norwegian sell an agreed upon number of seats on flight that Norwegian operates, and correspondingly buy a fixed number of seats on flights the partner operates. In accordance with current GAAP the sold capacity on Norwegian flights is recorded as gross revenue, and bought capacity is recorded at gross cost. Accordingly, all operational key figures (ASK, RPK and load factor) are reported using a gross principle.

### PROSPECTS FOR 2005

Entering the second quarter of 2005 the demand for seats with Norwegian is very good. After the launch of the Low Fare Calendar the sales over the internet (www.norwegian.no) has exceeded 70% of the total sales.

The company expect a yield of approximately NOK 0,74 for April. The development of the yield is related to changes in the route portfolio, with a lager portion of international flights and hence a longer average sector length. The yield on domestic flights is stabile compared to last month.

The company has an operational fleet of 13 aircraft. The utilisation of the fleet is expected to increase, with an estimated production increase of 40 - 45% (ASK) compared to last year. The increase is mainly on international routes.

Given the production increase following the code share agreement with Sterling and certain assumptions regarding the development of the fuel price and exchange rates, the company expect the cost pr ASK to decline to approximately NOK 0,5. During the first quarter the fuel price has increased, and contributes to a higher future cost. The company maintain an expectation of a combined positive operating profit for the next three quarters.

Fornebu, May 11. 2005 Bjørn Kjos Managing Director

## SENSITIVITY ANALYSIS

1 % increase in jet fuel price

1 % weakening of NOK against USD

1 % weakening of NOK against EUR

Effect on P/L MNOK

-3,3 -3,5 -1,7

The sensitivity analysis reflects the effect on P/L by substantial changes in market prices and exchange rates. The effect on P/L is annualized based on today's level of production, fuelprices and exchange rates

The quarterly report has been complied according to the same accounting principles that have been used in the Annual Report, and are in accordance with the Norwegian Accounting Standard no. 11.

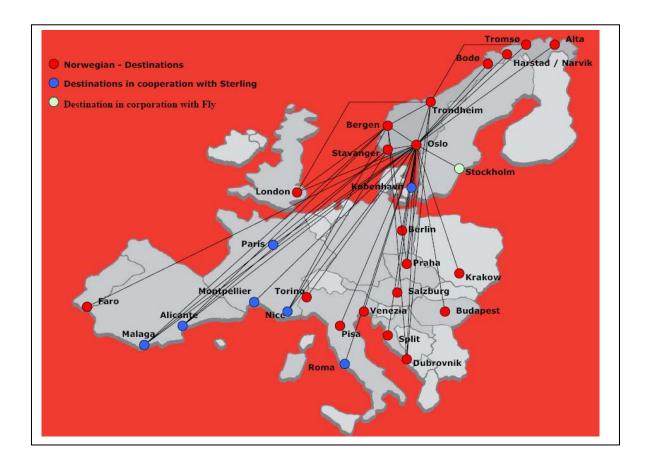

The accounts are not audited, and the figures given are preliminary.

### **Definitions**

ASK: Available Seat Kilometres. Number of available passenger seats multiplied by the flight distance. RPK: Revenue Passenger Kilometres. Number of paying passengers multiplied by the flight distance. CABIN FACTOR: Relationship between RPK and ASK as a percentage. Describes the rate of utilisation of available seats.

EBITDA: Operating profit/loss before financial items, taxes and depreciation

EBITDAR: Operating profit/loss before financial items, taxes, depreciation and leasing costs for aircraft
